PRODUCT **ODÍN**

DESCRIPTION

MINEA ODÍN is an aerosol formulated to protect all types of motors, mechanisms and metal parts from corrosion and sea salt, ensuring and achieving results with very high permanence.

It is dielectric, dissolves fats, oxides and unlocks seized elements.

CHARACTERISTICS

<i>aspect (20-25°C)</i>	colorless clear liquid.
<i>composition</i>	mixture of solvents and propellants.
<i>density (20°C)</i>	0,65 +/- 0,01 Kg/dm ³

APPLICATIONS

Naval and nautical sector: ideal for wintering preparations and fleet maintenance, lubricates and protects metal parts and all kind of surfaces in a single application.

Automotive sector: multipurpose lubricant. It loosens any piece or element while protecting it from future blockages.

DIY: for the maintenance of hinges, bicycles, motorcycles, lawnmowers, fishing gears, firearms, etc.

HOW TO USE

Shake the container vigorously. Spray directly on the surface to be treated at a distance of 15-25 cm. The product can also be applied with a cannula (supplied in the cap).

PACKAGING

Boxes of 12 aerosols of 400 cm³.
