PRODUCT **FERRONET**[®]

DESCRIPTION

MINEA FERRONET[®] is an acidic, liquid scale remover with great rust removing, degreasing and decalcifying power. It is not a harmful product. Suitable for food use. BIODEGRADABLE.

CHARACTERISTICS

<i>aspect (20-25°C)</i>	transparent light dun yellowish liquid.
<i>composition</i>	mixture of acids and surfactants.
<i>pH (1% V/V)</i>	2,00 +/- 0,1
<i>density (20°C)</i>	1,29 +/- 0,01 Kg/dm ³

APPLICATIONS AND PROPERTIES

High lime scale removing power.
Effective rust remover.
Completely soluble in all proportions of water.
Effective at any temperature, although its performance increases when worked hot.
Does not attack metals such as iron or copper, although may slightly attack light metals such as aluminium, zinc or tin when not alloyed.
It does not generate future oxidations or by vapour or by residue of the product itself.

USE FOR RUST REMOVAL

Use pure, applied with a brush, sponge, gun, etc. Leave to work for at least 10 minutes and then rinse with water. Repeat the operation for heavy rusting. It does not attack iron or painted surfaces.
1 kg of product cleans 29 m² or between 22 to 24 m² if it is attacked by corrosion (repeat the operation if there is a strong oxide layer).
For periodic recovery of decks and teak in the nautical and naval sector employ 25-50% with water and rinse well at the end.

USE FOR LIME SCALE

To remove lime scale on tanks, piping, heating or cooling circuits, boilers, containers, etc. Use dissolved in water in a proportion of 5 to 15%. Leave to work for 15 minutes to 1 hour, according to the thickness of the lime scale and the working temperature. Work hot where possible, at a temperature of 60°C. Rinse well after application to remove any waste.

PACKAGING

Plastic container: 7 Kg (box of 2 units), 14 Kg.
Boxes of 12 bottles of 1 Kg.
Boxes of 12 bottles of 350 g.
Boxes of 30 bottles of 350 g.
